Freesia "TECOLOTE" HYBRIDS

FREESIA "*Tecolote*" HYBRIDS

A comparison of a bunch of Freesia "*Tecolote*" Hybrids with old type Freesia Purity. These flowers were all grown on the same greenhouse bench.

FREESIA "*Tecolote*" HYBRIDS

The most striking characteristics of this New Strain are the IMMENSE size of the Flowers, and the Unusual Strength and Vigor of the Plants. Wide open Flowers of Great Substance, individual blooms measuring more than two and one-half inches in diameter are not uncommon. Delightfully fragrant.

The Stiff Heavy Stems average from twenty-four to thirty inches in length with many side branches, a great advantage to retail growers who can use the individual flowers as required.

This present season we are offering Freesia "*Tecolote*" Hybrids in a **MIXTURE OF TWENTY-FIVE MAGNIFICENT SHADES**, and the following separate colors.

MARIE, "*Tecolote*" Hybrid (Pat. No. 609). Gorgeous Pure White Freesia. Immense wide open flowers of great substance. Delightfully fragrant. Fine keeping qualities.

TALISMAN, "*Tecolote*" Hybrid (Pat. No. 555). Bright Orange-pink with rich Cream throat.

"TECOLOTE" HYBRIDS, Separate Colors.

Pure White

Light Yellow

Bright Red

New and Recommended Freesias

The old time varieties are being eliminated because the new Freesia introductions in the past ten years are so far superior in flowering performance that they bring top flower market prices everywhere.

IN ADDITION TO THE GRAND "TECOLOTE" HYBRIDS
DESCRIBED ON THE PRECEDING PAGE WE RECOMMEND

TWO 1946 INTRODUCTIONS

MAMMOTH WHITE, No. 137. A Grand Large Pure White Freesia that blooms very early.

MAMMOTH GOLDEN YELLOW, No. 174. Similar to a large very much improved Golden Daffodil Freesia. Very early.

ALSO—

ELDER'S GOLDEN GIANT. Very large wide open flowers of a Bright Golden Yellow. Late flowering.

ORIOLE. Fine Deep Golden Orange. Earliest of all.

GOLDEN WONDER. This has taken the place of Golden Daffodil in recent years.

BLANCHE BLUE. Still one of the best Blue Freesias. Large flowering.
